HBD LASER *SERIES*

*Oil Injected, Belt Driven
Rotary Screw Air Compressor*

HBD LASER compressors always offer high performance in laser cutting machines and mining industries.

General Features

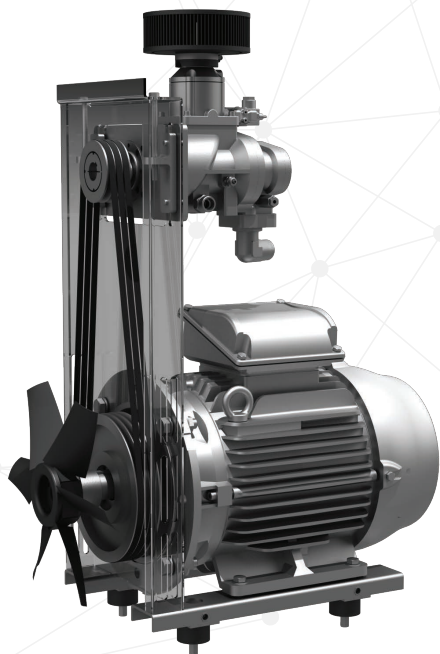

- High quality screw block and motor
- Electronic control
- Easy installation and quick implementation thanks to its compact design
- Designed for continuous operation
- Refrigerated and desiccant dryer options

Advantages

- A booster compressor is not needed to increase the pressure.
- Economic, service-friendly design minimizes downtime and reduces maintenance costs.
- Blind cover allows you to place it up against the wall. Convenient placement makes for easy servicing, maintenance, and access. (30 hp and below)
- Optimized intake chamber and insulated cold air intake increase energy efficiency. (40 hp and above)
- Compact design has the compressed air widget and compressor in a single place meets your expectations and demands at the optimal level.
- Efficient motor keeps energy use and costs down.
- High-quality components for a long service life and low maintenance costs.
- Dew point options from -40 to 37 °F in compact models.

Screw Block

- Durable screw block provides high-capacity of air and is specially selected for each model's capacity requirement
- New rotor profiles for reduced loss air production and lower torque requirements
- Next gen bearing design for improved load bearing capabilities
- Low maintenance and replacement costs

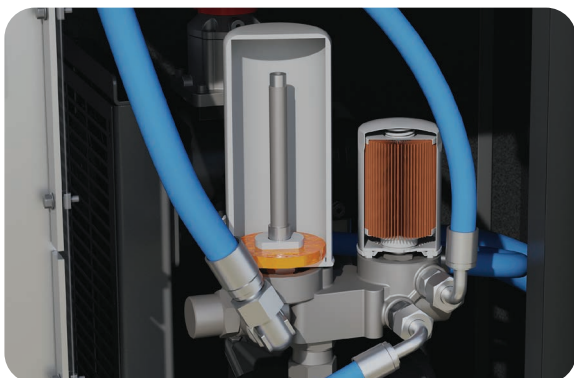

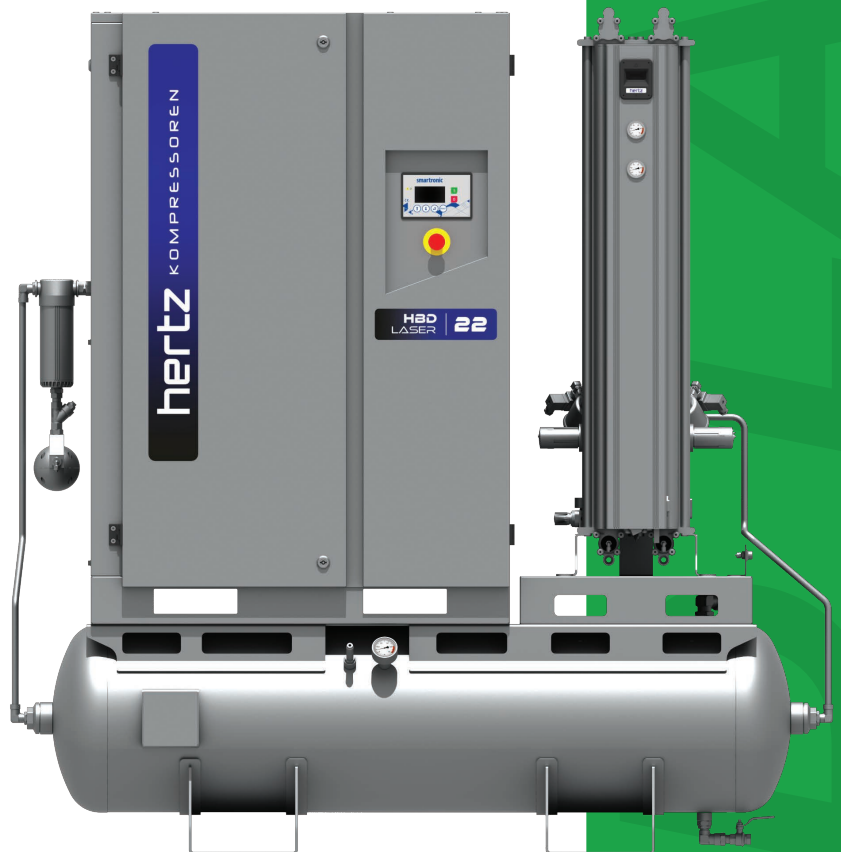

Main Motor and Drive System

- IE3 efficiency-class dual electric motors
- Star/delta motor starter
- Belt-pulley drive system
- Easy-to-use belt tensioner and pulley bushing for easy servicing

Intake System

- 99.9% efficiency in particle separation down to 3 microns
- Low pressure loss
- Easy maintenance
- Long service life

Air & Oil Separator

Spin-on separator

- Easy to replace, assemble, and disassemble
- Vertical oil receiver

Controller

- Without the need for an external main controller, ability to co-aged work synchronized with Master/Slave for up to two compressors
- Internal ModBus communication
- User-friendly on-screen interface
- Alarm log records last 20 alarms

60 Hz

Model	Pressure		Capacity*		Motor	Connection	Dimensions (in.)			Weight
